

Bulk Purchasing Checklist & Timeline for Scarcity Preparedness

Author: Manus AI **Date:** July 2025 **Purpose:** To provide a detailed, prioritized, and time-sensitive shopping list for creating a 5-10 year strategic reserve of non-renewable homesteading supplies before a period of extreme scarcity.

The Principle: Stockpile What You Cannot Make

This is not a normal shopping list. This is a strategic acquisition plan. The goal is to front-load your investment and create a buffer that will allow you to build your resilient homestead without relying on fragile supply chains. Every item on this list has been chosen because it is either impossible or extremely difficult to produce on a small homestead.

This phase is the most important and most urgent. It must be completed within the next 60 days.

URGENT ACTION: MONTH 1 (Days 1-30)

PRIORITY 1: SEEDS (Your Genetic Capital)

This is your absolute highest priority. Without seeds, you have no food security.

Item	Variety / Type	Quantity	Purpose	Estimated Cost (ZAR)
Microgreen Seeds	Broccoli, Radish, Kale	5kg each	Income & Nutrition	R4,000 - R6,000
	Pea Shoots, Sunflower	10kg each	Calories & Income	R3,500 - R5,500
	Mustard, Arugula	2kg each	Flavor & Variety	R1,500 - R2,500
Fodder Seeds	Barley, Maize (Corn)	50kg each	Animal Feed	R1,500 - R3,000
Survival Seed Vault	Heirloom Vegetable Mix	2-3 Vaults	Emergency Backup	R4,000 - R8,000
SUB-TOTAL				R14,500 - R25,000

CRITICAL NOTE: All seeds MUST be **Heirloom / Open-Pollinated**. Do NOT buy hybrid seeds.

PRIORITY 2: MINERALS & NUTRIENT PRECURSORS

These are the raw materials for your homemade nutrient solutions.

Item	Chemical Name	Quantity	Purpose	Estimated Cost (ZAR)
Epsom Salts	Magnesium Sulfate	25kg	Magnesium Source	R300 - R500
Kelp Meal	<i>Ascophyllum nodosum</i>	25kg	Micronutrients	R800 - R1,200
Bone Meal		25kg	Phosphorus & Calcium	R500 - R800
Corn Steep Liquor	CSL	25L	Nitrogen for Nitrate Tea	R800 - R1,500
Azomite / Rock Dust		25kg	Trace Minerals	R400 - R600
Gypsum	Calcium Sulfate	25kg	Calcium & Sulfur	R300 - R500
SUB-TOTAL				R3,100 - R5,100

ACTION: MONTH 2 (Days 31-60)

PRIORITY 3: INFRASTRUCTURE & SPARES

These are the plastic and metal components that are difficult to fabricate.

Item	Specification	Quantity	Purpose	Estimated Cost (ZAR)
Water Pumps	Submersible, 3000L/hr	4-6 units	Spares for Hydro/Aquaponics	R3,200 - R7,200
Air Pumps	Aquarium, dual outlet	4-6 units	Spares for Compost Tea	R1,200 - R2,400
Flexible Tubing	25mm, food-grade	100m roll	Spares & Expansion	R1,500 - R2,500
PVC Fittings	T-joints, elbows (25mm)	50 of each	Spares & Repairs	R1,000 - R2,000
Food-Grade Drums	200L, sealed top	4-6 units	Water storage, biogas digester	R1,200 - R2,400
Solar Panels	100W Monocrystalline	4-6 panels	Initial power system	R4,000 - R9,000
Deep Cycle Batteries	100Ah AGM or Gel	2-4 batteries	Energy storage	R4,000 - R10,000
SUB-TOTAL				R16,100 - R35,500

PRIORITY 4: TOOLS & PRESERVATION SUPPLIES

Invest in quality that will last a lifetime. Avoid cheap, disposable tools.

Item	Specification	Quantity	Purpose	Estimated Cost (ZAR)
Hand Tools	Shovel, Fork, Hoe, Rake	1 of each	Soil Garden	R1,500 - R3,000
Scythe	Austrian-style with peening kit	1 set	Grass/Grain harvesting	R2,000 - R4,000
Sharpening Stones	Coarse, Medium, Fine	1 set	Tool Maintenance	R500 - R1,000
Glass Jars	Mason/Consol, various sizes	100-200 jars	Seed bank, food preservation	R2,000 - R5,000
Jar Lids & Seals	New, for canning	500+	Food Preservation	R1,000 - R2,000
Silica Gel Packets	Desiccant, reusable	1kg bulk	Seed drying	R300 - R500
Oxygen Absorbers	For Mylar bags	500 pack	Seed preservation	R500 - R800
Mylar Bags	1-gallon size	100 bags	Seed preservation	R500 - R1,000
SUB-TOTAL				R8,300 - R17,300

TOTAL STRATEGIC INVESTMENT

Category	Low Estimate (ZAR)	High Estimate (ZAR)
Seeds	R14,500	R25,000
Minerals	R3,100	R5,100
Infrastructure	R16,100	R35,500
Tools & Supplies	R8,300	R17,300
GRAND TOTAL	R42,000	R82,900

NOTE: This investment may seem high, but it represents a **one-time cost** to secure the foundational materials for a lifetime of self-sufficiency. In a scarcity scenario, these items will be priceless.

WHERE TO BUY IN CAPE TOWN & SOUTH AFRICA

- **Seeds:**
 - **Heirloom:** Living Seeds (online), Seeds for Africa (online), local seed swap groups.
 - **Fodder:** Your local agricultural co-op (Kaap Agri, Afgri).
 - **Seed Vaults:** Takealot, specialized prepper websites.
 - **Minerals:**
 - **Agricultural Co-ops:** For bulk Epsom salts, Gypsum, etc.
 - **Hydroponic Shops:** For Kelp Meal, Azomite.
 - **Brewing Supply Shops:** For Corn Steep Liquor.
 - **Infrastructure:**
 - **Hydroponic Shops:** Pumps, tubing, fittings.
 - **Builders Warehouse / Makro:** General hardware.
 - **Plastics Manufacturers:** For bulk food-grade drums.
 - **Solar Suppliers:** For panels, batteries, inverters (e.g., Sustainable.co.za, Sinetech).
 - **Tools & Supplies:**
 - **Agrimark / Kaap Agri:** For quality farm tools.
 - **Online Retailers:** For specialized items like scythes and Mylar bags.
 - **Consol Glass / Packaging Suppliers:** For bulk jars and lids.
-

Storage of Your Stockpile

- **Seeds:** Must go into your **COOL, DARK, DRY, PROTECTED** seed bank immediately.

- **Minerals:** Store in sealed, labeled buckets in a cool, dry garage or storeroom.
- **Plastics & Tools:** Store out of direct sunlight to prevent UV degradation.

This checklist is your first and most important mission. Complete it, and you will have laid the foundation for true, lasting resilience.
